AHA INDIA HEALTHCARE FORUM 2027

Welcome Message

The American Heart Association has been at the forefront of advancing cardiovascular health, resuscitation science, education and healthcare quality for generations.

The India Forum 2027 brings this spirit of learning and collaboration into a three-day experience designed for healthcare professionals, educators, researchers, quality leaders, Training Centers, Faculty and the wider healthcare community.

The Forum is more than a conference.

It is a place where science becomes practice, education becomes confidence, quality becomes culture, and lifesaving actions become stories worth celebrating.

Across three days, participants will experience immersive workshops, contemporary Emergency Cardiovascular Care discussions, quality and certification sessions, scientific presentations, simulation-based competition, survivor stories and recognition of individuals and organisations making a difference.

With an expected participation of 1,000+ delegates, the Forum will create opportunities to learn from experts, exchange ideas, build professional connections and contribute to the continued advancement of healthcare delivery in India.

Join us.

Learn. Connect. Compete. Contribute. Celebrate.

The Three-Day Experience - Three Days. Three Perspectives.

A carefully structured journey taking participants from hands-on learning, to clinical excellence, to healthcare quality and certification.

18 FEBRUARY 2027 - DAY 01 - Workshops

The Forum begins with focused, interactive workshops designed to move beyond lectures and create opportunities for practical learning. Participants will engage with experienced educators and subject experts through hands-on sessions, demonstrations, discussions and applied learning.

19 FEBRUARY 2027 - DAY 02 – Sessions Focused on - Emergency Cardiovascular Care & Science

A full day dedicated to contemporary Emergency Cardiovascular Care, bringing together clinicians, educators and healthcare leaders. Explore evidence, implementation, clinical practice and the systems that influence patient outcomes.

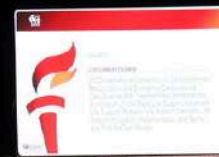

20 FEBRUARY 2027 - DAY 03 – Sessions Focused on - QUALITY & CERTIFICATION

From standards to sustained excellence.

The final day focuses on healthcare quality, certification, performance improvement and building systems that consistently deliver better care.

Science, Research & Competition - Where Ideas Meet Action

Scientific Abstracts - Share Your Work. Start A Conversation.

Researchers, clinicians, educators and healthcare professionals are invited to submit abstracts showcasing original research, educational initiatives, quality improvement projects and innovative approaches to healthcare delivery.

Selected abstracts will be featured through Poster Presentation. A dedicated space will be provided for participants to showcase their work, exchange ideas and engage directly with fellow professionals.

Critical Code Face-Off

The Critical Code Face-Off returns as a high-energy simulation competition where teams put their resuscitation knowledge and teamwork to the test.

Inspired by the successful competition format used in the earlier Summit, the challenge places teams in time-critical scenarios where every decision matters. The 2024 event described the competition as a timed, high-stakes simulation requiring teamwork and resuscitation skills.

Who will rise to the challenge?

Prepare. Perform. Respond.

The Human Side Of Resuscitation - Beyond Science. Beyond Statistics.

Every resuscitation has a human story. Every successful response represents a moment when someone recognised an emergency, acted quickly and made a difference.

The Healthcare India Forum 2027 will bring those stories to the centre of the Forum.

Survivor Stories - Lives Saved. Stories Shared.

Hear directly from survivors and families whose lives were changed by timely recognition, effective CPR and coordinated emergency care. These stories remind us that behind every guideline, every training session and every resuscitation programme is a person waiting for another chance at life.

Because the outcome is not just a number. It is someone's tomorrow.

CPR Heroes - Celebrating Those Who Stepped Forward

When an emergency happens, the first person to act can change everything. The Forum will recognise CPR Heroes whose courage, knowledge and immediate action helped save a life. From healthcare professionals to trained responders and members of the public, this recognition celebrates people who transformed knowledge into action.

We don't just teach lifesaving. We celebrate those who save lives.

Recognising Excellence

Excellence Deserves to Be Celebrated

Healthcare education and quality improvement are powered by people.

The India Healthcare Forum 2027 will bring the community together to recognise individuals and organisations whose commitment, leadership and contribution strengthen the ecosystem of lifesaving education and healthcare delivery.

American Heart Association Awards

Training Center Excellence - Recognising Training Centers that demonstrate commitment to quality, learner experience, programme delivery and continuous improvement.

Faculty Excellence - Celebrating Faculty who inspire learning, develop educators and contribute meaningfully to the advancement of resuscitation education.

Distributor Excellence - Recognising distribution partners who demonstrate professionalism, commitment, service excellence and support for the healthcare education ecosystem.

Special Recognition - Additional honours may recognise exceptional contribution, leadership, innovation or sustained service to the mission of improving healthcare outcomes.

Who Should Be There + Registration

The India Forum is designed to bring together professionals who influence patient care, healthcare education and healthcare quality.

Clinical Professionals – Doctors, Nurses, Paramedics & Emergency Care Professionals

Educators – Faculty, Instructors, Training Center Teams & Simulation Educators

Healthcare Leaders - Hospital Leaders, Administrators, Quality Professionals & Programme Leaders

Academia & Research – Researchers, Medical Colleges, Students & Healthcare Academics

Emergency Response - EMS Professionals, Resuscitation Teams & First Responders

Healthcare Ecosystem - Industry Partners • Distributors • Healthcare Organisations
